Snow Removal Procedure

Snow removal is challenging at Kingswood II. There is limited parking and limited places to plow the snow. This is a reminder that driveways must be vacant in order for the contractors to plow the driveways. The contractors are only required to come after the storm to plow and clean driveways, so please make every effort to either use your garage during a storm or move your vehicle when the contractors are in your area plowing the driveways.

Additionally, please do not store your surplus vehicles in the guest spots. There is limited parking and the contractors can not plow the visitor spaces when a vehicle is parked in that area.

If you have any questions, please contact the Managing Agent.

Your cooperation is appreciated.
